Answer in Nearpod Poll  
<https://nearpod.com/student/>  
Code to be given during class

- Execute the [“Spread of Disease” program](#) in Netlogo Web
  - Slow down model speed
  - Choose one variant
  - Select num-people 100
  - Click “set-up”
  - Click “go”
  - Play with “connections-per-node” in the “network” variant
  - Note that “disease-decay” only affects the “environmental” variant
- Indicate what the three variants do (network, mobile, environmental)

Go to [netlogoweb.org/launch](https://netlogoweb.org/launch) – run “IABM Textbook / chapter 6 / Spread of Disease”

# Social influence on a network

People are connected and perform actions

Various forms of “trend”:  
music/audio that is re-  
used, stitches, side-by-  
side “duets”,  
actions/challenges, etc.

*“Influencers” and  
their sponsored posts*

# Non-trivial examples

- **Back pain:** spread from West to East in Germany after fall of Berlin Wall
- **Suicide:** well known to spread throughout communities on occasion
- **Sexual “scripts”:** expected sequences of behaviors during intimate situations
- **Politics:** the denser your connections, the more intense your convictions

# What else?

What else propagates in a contagion-like manner?

# News, misinformation, and collective action

# Fake news

**Fake news** about an occult ritual to which the campaign chairman of US presidential candidate Hillary Clinton was invited.

This was posted four days before the 2016 election, which was won by her opponent, Donald Trump.

# Fake news spread

A combination of authentic (blue) and inauthentic (red) accounts, also known as bots. Yellow nodes were removed by Twitter and are probably also bots.

# Collective action

Spread of the #NiUnaMenos hashtag: a movement against gender-based violence and femicide started in Argentina in 2015

Colors based on communities detected through modularization optimization

# Summary

# Things to remember

- Direct social influence is observed online when connected people perform an action in sequence
- A wide array of phenomena spread through networks, not only viruses and information
